Art Unit: 2664

1. The Applicant's argument filed 10/17/03 have been entered and made of record.

2. Claims 29-45 are pending.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 4. Claims 29-33, 35-38, 40, 41-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Miloslavsky (U.S.Patent No.6,259,774 B1).

In the claims 29, 35, 40, Miloslavsky discloses a telephone call center system comprises an Internet connection adapted for receiving data from a WEB server, the data originating from the computer platform of a person browsing the Internet, including data identifying the browsing person, such as a telephone number, and indicating to the WEB server a desire of the browsing person to communicate with an agent at the call center (see abstract); comprising:

receiving the telephone call; identifying a telephone number associated with the received telephone call (see col. 10, lines 30-38, Browser 116 receives the HTML document and create a web page based on the HTML document (operation 414). After reviewing the

Art Unit: 2664

displayed web page, the user clicks on "call me" button 118. Browser 116 responses by sending a request for a phone call, together with telephone number and/or data identifying customer site 104, to server 132 (operation 416). Server 132 delivers the request and the telephone number to SRP 168, which in turn delivers the number to outbound call controller 354 (operation 424)....Data related to customer site 104 and the web page viewed by the user is delivered to the agent. The agent can then answer the call with all necessary information on hand (operation 434));

- retrieving information about the caller based on the identified telephone number (see col.
 2, lines 16-25, col. 8, lines 65-67, col. 9, lines 8-10);
- generating a web page containing the retrieved information (see col.10, lines 30-45);
 wherein the web page has an associated identifier (URL or uniform resource locator) (see col. 9, lines 30-32);
- transmitting the identifier associated with the web page to an agent selected to answer the received telephone call (see col. 10, lines 30-45).
- 5. In the claims 30, 36, Miloslavsky discloses displaying the web page to the selected agent (see col. 10, lines 8-10).
- 6. In the claims 31, 37, Miloslavsky discloses establishing a connection between the caller and the selected agent (see col. 9, lines 25-30).
- 7. In the claims 32, Miloslavky discloses the identifier associated with the web page is the uniform resource locator (URL) of the web page (see col. 10, lines 42-45).

Art Unit: 2664

8. In the claims 33, 38, 41, 42, 43, 44, Miloslavky discloses selecting the agent to answer the received telephone call before transmitting the identifier (URL) associated with the web page (see col. 2, lines 15-20).

- 9. In the claim 45, Miloslavsky discloses a telephone call center system comprises an Internet connection adapted for receiving data from a WEB server, the data originating from the computer platform of a person browsing the Internet, including data identifying the browsing person, such as a telephone number, and indicating to the WEB server a desire of the browsing person to communicate with an agent at the call center (see abstract); comprising:
- telephone call (see col. 10, lines 30-38, Browser 116 receives the HTML document and create a web page based on the HTML document (operation 414). After reviewing the displayed web page, the user clicks on "call me" button 118. Browser 116 responses by sending a request for a phone call, together with telephone number and/or data identifying customer site 104, to server 132 (operation 416). Server 132 delivers the request and the telephone number to SRP 168, which in turn delivers the number to outbound call controller 354 (operation 424)....Data related to customer site 104 and the web page viewed by the user is delivered to the agent. The agent can then answer the call with all necessary information on hand (operation 434));
- retrieving information about the caller based on the identified telephone number (see col. 2, lines 16-25, col. 8, lines 65-67, col. 9, lines 8-10);

Art Unit: 2664

♦ generating a web page containing the retrieved information (see col.10, lines 30-45); wherein the web page has an associated identifier (URL or uniform resource locator) (see col. 9, lines 30-32);

transmitting the identifier associated with the web page to an agent selected to answer the received telephone call (see col. 10, lines 30-45).

Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 34, 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Miloslavsky (U.S. Patent No. 6,259,774) in view of Miloslavsky (U.S. Patent No. 5,765,033).

In the claims 34, 39, Miloslavsky (U.S.Patent No. 6,259,774) discloses the limitations of claim 33 above.

However, Miloslavky (U.S.Patent No. 6,259,774) does not disclose selecting an agent to respond to the request, the selection of the agent being based on the content of the web page (web page associated with a particular product).

Miloslavky (U.S.Patent No. 5,765,033) discloses selecting skill person who is suitable for responding to content of the e-mail (e-mail associated with particular product "for example, the

Application/Control Number: 09/855,860

Art Unit: 2664

e-mails may relate to all aspects of the products and services offered by a company named

ABC"); comprising:

selecting an agent (skill person) to respond to the request, the selection of the agent being

based on the content of data (data associated with a particular product) (see col. 3, lines

15-18).

Thus, it would have been obvious to one of ordinary skill in the art at the time of the

invention to modify Milosavky (U.S.Patent No. 6,259,774) with the teaching of Miloslavky

(U.S.Patent No. 5,765,033) to select of the skilled person based of the data retrieved from the

server in order to help the user to get the specific answer from the expert person. Therefore, the

quality and efficiency of services provided by the expert person can be improved tremendously.

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Chuong Ho whose telephone number is (703)306-4529. The

examiner can normally be reached on Monday-Friday from 9am to 3pm.

13. If attempt to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Wellington, Chin, can be reached on (703)305-4633.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be direct to the group receptionist whose telephone number is (703) 305-3900.
